< Speech draft by representative of students >

@The commemoration ceremony for donation of science laboratory at Masyam Higher Secondary School, Dumre, Palpa, Nepal

Honorable chairman, distinguished guests, respected teachers and dear friends.

I am the representative of the students, Sundar Gaha.

We students are very happy that we could fulfill our desire to study science at Dumre through the great assistance of Prof. Dr. Harutaka Sakai.

We all village students were not in the position of studying science because of economic condition, but our great desire to study science is fulfilled by the establishment of model laboratory at our school through the donation of the members of Kyushu University Wandervogel club of Japan.

So, we are grateful to the Japanese people as well as the school management committee of this school.

By studying science, in near future, we want to be an engineer, doctor and nurse, then we will contribute to our society as well as the nation.

Again at last we want to express our thanks to all the Japanese donors who helped us to study science at Dumre.

We would like to request Prof. Dr. Harutaka Sakai to convey our message to the members of Wandervogel club of Kyushu University, Japan.

We science students are as follows;

Sundar Gaha

Bibek Pandey

Raj Kumar Panta

Tek Bahadur B.K.

Binshnu Bahadur Sinjalee

Sakar Bhandari

Bish Ram Dhakal

Amrit Rana

Sushila Basnet

Pooja Rawal
